## TECHNICAL SKILLS

**Languages:** Python, JavaScript(ES6, Node.js), HTML5, CSS, SQL | **Frameworks/Libraries:** Flask, Jinja2, jQuery, React, Express, Bootstrap, React-Bootstrap, Material-UI | **Databases:** MySQL, MongoDB, Mongoose | **Tools:** AJAX, REST API, JSON, PostMan, Socket.io, AWS(EC2), MySQL Workbench, Git, Github, Balsamiq

## TECHNICAL PROJECTS

**TravelMem** | Travel experiences and memories sharing application using Python / Flask / MySQL | [Github](#)

- Employed Flask framework for fast implementation of additional features via Jinja2 template such as user dashboard, varied logic for authorization, and flash messages.
- Encrypted user password through the use of Bcrypt and hashing for user security.
- Used back end validation to verify user input and keep data consistent for user to create, read, update and delete travel memories.
- Utilized one-to-many and many-to-many relationships within MySQL to connect all registered users, allowing for liking posts and adding comments.
- Integrated Open Weather API to view up-to-date weather from the travel locations.
- Implemented Bootstrap for responsive design and styled with HTML5 and CSS for engaging UI components and page layouts.

**nutrilog** | Nutrition tracker application using MongoDB / Express.js / React.js | Node.js | [Github](#)

- Architected an intuitive single page app with React and implemented responsive design with React-Bootstrap for a consistent user experience across screen sizes.
- Developed back-end with Express and MongoDB for their flexible structure and ease of data access.
- Implemented a user login and registration using back-end validation, Cookies, and JSON Web Token for secure user experience.
- Created RESTful API in order to allow user CRUD operations.
- Integrated the USDA FoodData Central API to incorporate nutrition data.

## PROFESSIONAL EXPERIENCE

Mission Bell Inc. | Morgan Hill, CA

**CAD Engineer**

05/16- 05/22

- Promoted in summer of 2021 to manage and train an international team of four engineers from Bolivia responsible for detailed CAD shop drawings.
- Generated detailed 2D drawings and 3D models of all individual system components for custom millwork assemblies in AutoCAD.
- Collaborated with all stakeholders to evaluate design trade-offs, balance interests, and meet the optimal system design for each project.
- Presented project updates to management and address path-to-closure on open issues.

**Junior Engineer**

05/15- 04/16

- Created, organized, and revised Standard Operating Procedure documents.
- Assisted project managers in preparing various items including cost estimation, project timelines, and mockups.
- Managed project portfolios, documentation and updated with new design revisions.
- Promoted to CAD engineer after ~10 months. Without prior industry experience learned to develop 2D CAD shop drawings and assess for manufacturing readiness and feasibility on the job.

## EDUCATION

**Coding Dojo** | Full-Stack Developer Certificate in Python, MERN

**University of California, Davis** | Bachelors of Science in Mechanical Engineering
